# PROGRAM FAQs

## WHAT IS THE POWER MOVES® COMMERCIAL & INDUSTRIAL REBATE PROGRAM?

The POWER MOVES® C&I Rebate Program helps make upgrades, renovations and new construction projects at your business more affordable by offering rebates on energy-efficient equipment. Provided by Wabash Valley Power Alliance (WVPA) and its participating member co-ops, the program makes energy-efficiency projects more affordable, so you can save more energy (and money) in the long run!

## WHO IS ELIGIBLE TO PARTICIPATE IN THIS PROGRAM?

Non-residential members of participating electric cooperatives are eligible within existing or new business facilities. The business/facility must be located on participating co-op lines. Visit [www.PowerMoves.com](http://www.PowerMoves.com) to find out whether your co-op participates.

## WHICH PROJECTS QUALIFY FOR A REBATE?

Your business can earn rebates on a set list of prescriptive (or one-for-one) upgrades, a custom project (if your measures don't fall into our set list), or you can take advantage of available new construction rebates. Eligible equipment includes LED lighting, variable frequency drives, HVAC, geothermal heat pumps and more! To review all potential rebates, explore this application, visit [www.PowerMoves.com](http://www.PowerMoves.com), or contact us at **877.653.8288** or [apply@PowerMoves.com](mailto:apply@PowerMoves.com) as soon as you start thinking about your project. We're here to help!

## HOW DO I KNOW IF MY PROJECT QUALIFIES AS A PRESCRIPTIVE PROJECT, A CUSTOM PROJECT OR A NEW CONSTRUCTION PROJECT?

- A **prescriptive project** is one in which you are replacing an existing piece of equipment for another qualifying piece of equipment listed on the application.
- A **custom project** is one in which you know you will save electricity through the project, but the equipment is not listed on the application. In this case, you would contact **877.653.8288** or [apply@PowerMoves.com](mailto:apply@PowerMoves.com), then complete the Custom application to get your rebate funds pre-approved prior to purchasing equipment.
- A **new construction project** must involve commercial new construction, an addition on an existing commercial facility, the change of use of a commercial facility, or the total gut rehab of an existing commercial facility. If this is the case, you must complete a Project Information Form to begin.
- Still not sure? Contact **877.653.8288** or [apply@PowerMoves.com](mailto:apply@PowerMoves.com) today and we'll help!

## WHAT IS THE MAXIMUM REBATE EACH MEMBER CAN EARN?

For new construction projects, the prescriptive program has a \$25,000 per building cap, the custom program has a \$50,000 per building cap. For prescriptive retrofit projects, the limit is \$25,000 per member per calendar year. For the custom retrofit projects, the limit is \$50,000 per member per calendar year.

## WHO RECEIVES THE REBATE PAYMENT?

This is entirely up to the member. All checks are paid automatically to the member unless the member designates the payment be made to a third-party on the application.

## WHAT IS A TRADE ALLY?

A Trade Ally is any contractor who sells or installs energy-efficient equipment, and/or assists customers with their rebate applications.

## WHAT IS THE DEADLINE FOR APPLYING?

The best way to determine your project's deadline is by contacting us at **877.653.8288** or [apply@PowerMoves.com](mailto:apply@PowerMoves.com). In general, you must apply for a prescriptive rebate within 60 days from the project's completion. All custom projects require pre-approval before purchasing product. For new construction, please include us in your design process. Visit [www.PowerMoves.com](http://www.PowerMoves.com) to download the application.

## WHAT MUST BE INCLUDED ON MY PROJECT'S INVOICES?

Clear, legible invoices are required when submitting your application. Please make sure your invoices include:

- Invoice number and date
- Vendor name and address
- Itemized list of specific equipment, including: model number, manufacturer, unit price, and quantity
- Serial numbers for each newly installed heat pump, AC unit, chiller, air compressor, or VFD
- Customer name and installation address
- Purchase total
- If payment is made to third-party the rebate must be shown deducted from project total.

## HOW CAN I GET THE MOST FROM THIS PROGRAM?

Talk to us before your plans are on paper. Often, we can help you and your contractors find a better solution at a lower cost, while paving the way for additional rebates.

## WHAT ARE THE STEPS FOR APPLYING?

Great question! See the steps outlined on the following pages.

# HOW TO APPLY

01

## VERIFY ELIGIBILITY.

To qualify for rebates in the POWER MOVES® program, the non-residential building must be located on co-op lines. Program eligibility requirements are subject to change or termination with or without notice at the sole discretion of Wabash Valley Power Alliance, so please call your co-op to verify participation or see the list at [www.PowerMoves.com](http://www.PowerMoves.com). To meet rebate criteria, all products must be DesignLights Consortium (DLC) listed. For reference please visit [www.PowerMoves.com/why-DLC](http://www.PowerMoves.com/why-DLC).

02

## DETERMINE WHICH PROGRAM(S) YOU SHOULD APPLY WITHIN.

The best way to do this is to contact the energy advisor at your co-op as soon as you start thinking about the project. While prescriptive projects do not require pre-approval, custom and new construction projects do. And by calling us before you put your plans in place, we can help you get the highest rebate available for your project.

04

## WE MAIL YOU A CHECK.

You cash it!

Is pre-approval required?

YES  NO

## PRESCRIPTIVE PROGRAM

If your project is a one-for-one replacement with a measure(s) listed on the prescriptive worksheet, please apply for rebate through the PRESCRIPTIVE PROGRAM.

- Select and install qualifying equipment.** Be sure to review the requirements listed in the application.
- Submit your completed application.** Within 60 days of completing your project, submit the application form, the worksheet that corresponds to your project, the invoice or proof of purchase, and the specifications for your new equipment.

- Be available for a potential walk-through.** Call us to schedule a final inspection of the installed equipment.

Is pre-approval required?

YES  NO

## CUSTOM PROGRAM

If your project does not match one of the prescriptive measures listed on the worksheet, and you are certain it will save energy, you may qualify for rebates through the CUSTOM PROGRAM.

- Submit a Custom Rebate Application for pre-approval.** This needs to be submitted before you purchase your new equipment.
- Review your project with an energy engineer.** After we receive your application, we will contact you to discuss your project in greater detail.
- Sign and return your Funds Reservation letter.** Based on your pre-approval application and discussion with our energy engineer, you will receive a letter outlining the rebate total we've reserved for you. Please sign and return within 7 days.
- Keep in touch to keep your rebates on track.** Complex projects can change along the way. Just remember to keep us in the loop so we can make sure you're still eligible for rebates.

- Complete your project and submit your application.** Within 60 days of completion, submit the Final Custom Rebate Form, all invoices or proofs of purchase, and the specifications for your new equipment.
- Meet with an energy engineer for final inspection.** Call us to schedule a brief walk-through to ensure what you installed matches your application.

Is pre-approval required?

YES  NO

## NEW CONSTRUCTION PROGRAM

If your project involves new construction, an addition to an existing facility, a change in use of a facility, or the total gut rehab of an existing facility, you may qualify for rebates through the NEW CONSTRUCTION PROGRAM.

- Contact the energy advisor at your co-op.** As soon as you start thinking about the project, we'll help you set up a meeting with a POWER MOVES® energy engineer. We'll collaborate with you, your contractors, architect and designer on the equipment qualifications necessary to receive the most rebates.
- Submit a Project Information Form.** This form outlines your project plans. Your energy engineer will use this information to talk with you and/or your contractor about rebate qualifications and project timing.

- Keep in touch to keep your rebates on track.** Complex projects can change along the way. Just remember to keep us in the loop so we can make sure you're still eligible for rebates.
- Complete your project and notify us for an inspection.** If what you've installed matches what you told us, we're good to go! If things don't match, we will make adjustments and let you know if this impacts your eligibility or rebate amount.
- We prepare the final paperwork – you just sign!** This document will show what you did and the amount of rebates you'll receive.

---

# 2026 COMMERCIAL & INDUSTRIAL PROGRAM

# TERMS AND CONDITIONS

---

This program can be changed or cancelled at any time at the sole discretion of Wabash Valley Power Alliance, with or without notice.

## ELIGIBILITY REQUIREMENTS

- Non-residential members of electric cooperatives participating in Wabash Valley Power Alliance's POWER MOVES® energy efficiency programs. Facility or business must be located on participating co-op lines. Please call your co-op to verify participation or see the list at [www.PowerMoves.com](http://www.PowerMoves.com).
- Program eligibility requirements are subject to change or termination with or without notice at the sole discretion of Wabash Valley Power Alliance.

## PROGRAM PARAMETERS

- All rebated equipment must be new; used or rebuilt equipment is not eligible for a rebate.
- Rebate items must be installed on the electric cooperative account listed on this application.
- Rebated equipment must meet program technical specifications.

## APPLICATION PROCEDURES AND DEADLINES

- Applications are to be submitted within 60 days after the project completion date. An invoice and all required documentation must be included for the application to be considered complete.
- Rebated equipment must be installed and operational on or after Jan. 1, 2026 and on or before Dec. 31, 2026. All applications should be postmarked by Feb. 28, 2027.

## ABILITY TO CONFIRM INSTALLATION (RIGHT TO CONDUCT INSPECTION)

- Pre-install inspection: Wabash Valley Power Alliance reserves the right to inspect the program participant's facility to verify that equipment meeting program qualifications does exist prior to providing a rebate, and the program participant agrees to provide reasonable access to the premises for such purposes.
- Post-install inspection: Wabash Valley Power Alliance reserves the right to inspect the program participant's facility to verify that equipment matching the information provided on the program application has been placed in service at that facility, and the program participant agrees to provide reasonable access to the premises for such purposes.
  - Following a post-inspection, participants have 30 days to submit any additional information requested by Wabash Valley Power Alliance. Failure to submit requested information may result in application rejection.
  - If the post-inspection finds the owner or their contractor did not comply with program rules and standards, any rebate received must be returned to Wabash Valley Power Alliance within 60 days of notice of noncompliance.
- Wabash Valley Power Alliance reserves the right to conduct an additional post-install inspection for program portfolio evaluation, measurement, and verification (EM&V) purposes. Rebates received will not be affected by the results of this inspection.

## HOW PAYMENTS ARE TO BE MADE AND RIGHTS RESERVED WITH THE FORM OF PAYMENT

- The maximum total C&I prescriptive rebate payment per member is \$25,000 per year and the maximum for a custom project is \$50,000 per year.
- The rebate payment cannot exceed 75% of the Prescriptive project cost and 50% of the Custom project cost. Self-installation labor costs cannot be included in total project cost.
- Initial payment will be made to the member's REMC who will then distribute the incentive to the member or to a third-party, if requested on this application. Please allow 8-10 weeks after final approval is complete for incentive payment.
- Wabash Valley Power Alliance reserves the right to withhold payment for projects that do not meet the program requirements, as determined within its sole discretion.
- Program funds are limited. Rebates are available on a first-come, first-served basis.
- Rebate amounts, thresholds, and offerings are subject to change or termination with or without notice at the sole discretion of Wabash Valley Power Alliance.
- Wabash Valley Power Alliance is not liable for rebates promised as a result of program misrepresentation or lack of rules verification.

## LOGO USAGE

- Program applicants, participants or trade allies may not use our logo or name without prior express written permission.

## DISCLAIMERS FOR WVPA'S LIABILITY FOR PROGRAM PARTICIPATION

- Wabash Valley Power Alliance and its member cooperatives do not endorse any particular manufacturer, product, or system design by offering these rebates;
- Will not be responsible for any tax liability imposed on any program participant as a result of the payment of rebates;
- Do not expressly or impliedly warrant the performance of installed equipment;
- Are not responsible for the handling, storage, treatment, transportation, or disposal of any waste generated as a result of any measures for which rebates have been applied for and/or received under this program nor any resultant environmental contamination related to the same;
- Are not liable for any damage caused by the operation or malfunction of the installed equipment; and
- Do not guarantee that a specific level of energy or cost savings will result from the implementation of energy conservation measures or the use of products funded under this program.

# 2026 RETROFIT PRESCRIPTIVE REBATES

## LIGHTING SPECIFICATIONS

LIGHTING CONTROLS				
Equipment Type	Replacing	Unit	Rebate	Specifications
Occupancy Sensors – Wall-Mounted ( <i>must control a minimum of 75 watts</i> )	Manual Control	Sensor	\$20	
Occupancy Sensors – Ceiling-Mounted ( <i>must control a minimum of 75 watts</i> )	Manual Control	Sensor	\$30	
Occupancy Sensors – Fixture-Mounted ( <i>must control a minimum of 75 watts</i> )	Manual Control	Sensor	\$20	May be wall- or ceiling-mounted, passive infrared, ultrasonic, or dual technology sensors which are permanently installed. Program start ballasts are recommended for longer life with occupancy sensors.
Interior Luminaire-Level Lighting Controls < 10,000 Lumens ( <i>approximately 90 watts</i> )	Manual Control	Sensor	\$20	The system must control LED fixtures less than 90 watts and be on Design Lights Consortium (DLC) Network lighting control qualified product list version 5.0 or higher available at <a href="http://designlights.org">designlights.org</a>
Interior Luminaire-Level Lighting Controls ≥ 10,000 Lumens ( <i>approximately 90 watts</i> )	Manual Control	Sensor	\$30	It is recommended to commission the daylighting controls to verify operation. If one controls device can perform two or more functions, only one rebate from this section is allowed. The rebate amount will be the highest amount for which the device qualifies.
Interior Networked Lighting Controls	Manual Control	Square Foot	\$0.20	

SIGNS & SIGNALS				
Equipment Type	Replacing	Unit	Rebate	Specifications
LED, T-1, or Electroluminescent Exit Signs	Incandescent or CFL Exit Sign	Sign	\$6	Rebates are based on a one-for-one replacement of existing exit signs with LED, T-1, or Electroluminescent exit signs. Exit signs must be equal to or less than 8 watts including the power supply for the battery backup. CFL exit signs do not qualify for a rebate.

Fixture Removal (Interior)				
The rebate can only be used for fixtures that have been completely removed and not replaced. For example: If you are replacing 65 fixtures with 65 new fixtures, you are not eligible for this fixture removal rebate. However, if you are replacing 65 fixtures with only 50 new fixtures, you may use this fixture removal rebate on the 15 fixtures that have been permanently removed. Fixture removal requires a permanent removal of lamps, ballasts and sockets in the system being rebated. By submitting this form, you are granting permission for POWER MOVES® to verify removal at their discretion. The rebate is \$0.10 per Watt removed.

# NEW CONSTRUCTION PROGRAM

## WHAT IS THE NEW CONSTRUCTION PROGRAM?

This program provides rebates for commercial accounts that are:

- Building a new facility,
- Adding on to an existing facility, or
- Changing the use of an existing facility or completing a total gut rehab.

## WHO IS ELIGIBLE?

- Non-residential members of participating electric cooperatives.
- Building must be located on participating co-op lines.

## WHAT IS THE REBATE LIMIT?

Rebates are PER BUILDING per year.

- \$25,000 Prescriptive
- \$50,000 Custom

## HOW DO I GET THE MOST FROM THIS PROGRAM?

Talk to us before your plans are on paper. Often, we can help you and your contractors find a better solution at a lower cost and provide more rebate money.

## HOW DO I GET STARTED?

Talk to your co-op. Ask them for a Project Information Form and to set up a meeting with our BNC energy engineer.

## WHAT BASELINE DO YOU USE?

All rebates in this program are based on local energy codes:

- IN = ASHRAE 90.1-2007
- IL = 2024 IECC

## ITEMS NOT ON THE LIST?

NO PROBLEM! WE CAN REVIEW AND PROVIDE A CUSTOM REBATE OFFER.  
CONTACT US TODAY! CALL 877.653.8288 OR EMAIL [APPLY@POWERMOVES.COM](mailto:APPLY@POWERMOVES.COM).

FACILITIES - LIGHTING	
Equipment Type	Rebate
Interior ≥ 10% More Efficient Than Code	\$200/1,000 ft <sup>2</sup>
Interior ≥ 20% More Efficient Than Code	\$300/1,000 ft <sup>2</sup>
Interior ≥ 30% More Efficient Than Code	\$350/1,000 ft <sup>2</sup>
Interior ≥ 40% More Efficient Than Code	\$400/1,000 ft <sup>2</sup>
Interior ≥ 50% More Efficient Than Code	\$450/1,000 ft <sup>2</sup>
Exterior Lighting	up to \$120/Fixture

FACILITIES - HVAC	
Equipment Type	Rebate
Air Source Heat Pumps	\$50 - \$300/Ton
Geothermal Heat Pumps	\$500 - \$750/Ton
Air Cooled Unitary Packaged A/C and Split Systems	\$60 or \$75/Ton
VFDs on HVAC Systems	\$100/HP (not code required)
Chillers	\$20 - \$60/Ton

FACILITIES - MISCELLANEOUS	
Equipment Type	Rebate
VFDs on Process Systems	\$80/HP
VFD Screw Air Compressors ≤ 200 HP	\$80/HP
Commercial Food Service Equipment	Varies

# 2026 RETROFIT CUSTOM REBATES SPECIFICATIONS

---

We cannot process applications if required documentation/information is not included. Please read this application carefully and include all information requested, including proposals and specification sheets. Not submitting requested documents will significantly delay processing and may disqualify your application. See “How to Apply” on pages 6-7 and the terms and conditions on page 8 for more information. Additional terms and conditions for Custom Rebates are found below.

## REBATE AMOUNTS

- Lighting and lighting controls project are calculated using \$.05/kWh saved in the first year.
- Non-lighting projects are calculated using \$.10/kWh saved in the first year.

## CUSTOM PROGRAM REBATES HAVE LIMITS AS FOLLOWS:

- Pre-approval is required prior to purchasing equipment
- Rebates cannot exceed:
  - \$50,000 per calendar year per C&I member. Over cap requests will be considered but are not guaranteed, and should be made in writing to the POWER MOVES® Program Manager.
  - 50% of the project's cost.
- Paybacks must fall between 1-7 years.
  - If the calculated rebate will provide the member a project cost payback of less than 1 year, the rebate will be reduced to achieve a 1 year payback.
  - If the project cost payback is greater than 7 years no rebate will be paid.
- Projects must follow basic POWER MOVES® specifications as listed in the other applications and based on the type of custom project. Contact your energy engineer for specific requirements for your project.
- If you change equipment from what was pre-approved, we reserve the right to reduce or deny a rebate amount.
- Self-installed labor cannot be included in the project cost.
